Agricultural and Forest Meteorology 87 (1997) 331–332

AGRICULTURAL AND FOREST METEOROLOGY

Contents of Volume 87, 1997

VOL. 87, NO. 1 — NOVEMBER 1997

Special issue
Physical and Biophysical Processes in the Vegetation Environment

Foreword 1

Modelling the turbulence structure in the canopy layer
S. Shen and M.Y. Leclerc 3
Flux association in coherent structures transporting CO_2, H_2O, heat and ozone over the code grid site
C.M. Mitic, P.H. Schuepp, R.L. Desjardins and I.J. Macpherson 27
Airborne metal pollutants in high elevation forests of southern Quebec, Canada, and their likely source regions
Z.-Q. Lin, R.S. Schemenauer, P.H. Schuepp, N.N. Barthakur and G.G. Kennedy 41
Evaporation and potential evapotranspiration in India under conditions of recent and future climate change
N. Chattopadhyay and M. Hulme 55
Water use efficiency and total dry matter production of bush bean under plastic covers
M. Raeini-Sarjaz and N.N. Barthakur 75

VOL. 87, NOS. 2–3 — 15 NOVEMBER 1997

Calculating daytime mean relative air mass
X. Yin 85
Urban aerosol and clear skies spectra for global and diffuse photosynthetically active radiation
C.P. Jacovides, F. Timbios, D.N. Asimakopoulos and M.D. Steven 91
Simulating the surface energy budget over the Konza Prairie with a mesoscale model
J. Song, C.J. Willmott and B. Hanson 105
Area-average estimates of evaporation, wetness indicators and top soil moisture during two golden days in EFEDA
W.G.M. Bastiaanssen, H. Pelgrum, P. Droogers, H.A.R. de Bruin and M. Menenti 119
Spatial and temporal variability of nocturnal summer frost in elevated complex terrain
L. Lindkvist and S. Lindqvist 139
Estimation of transpiration by single trees: comparison of sap flow measurements with a combination equation
H. Zhang, L.P. Simmonds, J.I.L. Morison and D. Payne 155
Relationships between climatic variables and Ascochyta blight of chickpea in Punjab, India
O.P. Jhorar, S.S. Mathauda, G. Singh, D.R. Butler and H.S. Mavi 171
Experimental design for flux measurements: matching scales of observations and fluxes
H.P. Schmid 179
Influence of target characteristics on the amount of water splashed by impacting drops
L. Huber, H.A. McCartney and B.D.L. Fitt 201
Shadow-band corrections for photosynthetically-active radiation under clear and overcast conditions
R.H. Grant 213
Estimation of maximum possible daily global solar radiation
D.W. Meek 223

VOL. 87, NO. 4 DECEMBER 1997

Methods for estimating vapor pressure deficit at a regional scale depending on data availability
F. Castellví, P.J. Perez, C.O. Stockle and M. Ibañez 243
Maize growth: assessing the effects of global warming and CO_2 fertilization with crop models
G.B. Dhakhwa, C.L. Campbell, S.K. LeDuc and E.J. Cooter 253
Modelling transpiration in holm-oak savannah: scaling up from the leaf to the tree scale
J.M. Infante, S. Rambal and R. Joffre 273
Growing degree-days: one equation, two interpretations
G.S. McMaster and W.W. Wilhelm 291
Calculation of CO_2 flux from forest soil using ^{222}Rn calibrated method
M. Uchida, Y. Nojiri, N. Saigusa and T. Oikawa 301
Microclimate of clear-cut, forest interior, and small openings in trembling aspen forest
D.W. Carlson and A. Groot 313

Contents of Volume 87, 1997 331
